

Office365MailFlow

The screenshot shows the Office 365 Admin Center interface in a web browser. The address bar displays the URL: `https://portal.office.com/admin/default.aspx#@/Domains/Add?domainName=uni-szie.hu`. The page title is "Office 365".

Left Sidebar:

- Add a new domain in Office 365** (highlighted in blue)
- Step 1** (Verify domain) - marked with a checkmark
- Step 2** (Add users) - marked with a checkmark
- Step 3** (Set up domain) - marked with a blue dot

Main Content Area:

Which services do you want to use with uni-szie.hu?

- ☐ Outlook on the web for email, calendar, and contacts
- ☒ Skype for Business for instant messaging and online meetings
- ☒ Mobile Device Management for Office 365

[Why aren't other services like SharePoint Online listed here?](#)

Next, we'll show you the DNS records you need to add at your DNS host. These records are required for your Office 365 services to work on uni-szie.hu.

Next ➔

Windows Taskbar: The taskbar at the bottom shows various application icons including File Explorer, Mail, and Office apps. The system clock indicates the time is 10:06 on 3.12.2015.

szie.hu

Accepted domains are used to define which domains will be accepted for inbound email routing.

*Name:

szie.hu

Accepted domain:

szie.hu

This accepted domain is:

☐ Authoritative: Email is delivered only to valid recipients in this Exchange organization. All email for unknown recipients is rejected.

☒ Internal Relay: Email is delivered to recipients in this Exchange organization or relayed to an email server at another physical or logical location.

☐ Make this the default domain.

☐ Accept mail for all subdomains
